EDUCATION & CERTIFICATION

Sivas Cumhuriyet University | B.Sc. in Computer Engineering

2022 - October 2026 (Graduated) | GPA: 3.09 / 4.00

Samsung Innovation Campus | Completed training and earned certificate

PROJECTS

Banking AI Harness | Java, MCP | Private, ongoing proof of concept

- Built a banking assistant prototype connecting an LLM to mock banking services through native tool calling and MCP; implemented schema-validated workflows and controlled tool execution.
- Verified scheduled transfers and price-triggered gold sales through live-model runs; developed 150+ automated tests covering workflow behavior, validation, and failure handling.

Mevzun - Legal Workspace | Go, Wails, Svelte, SQLite/SQLCipher | Private, ongoing project

- Developed a local-first desktop workspace for legal case and document management, including encrypted local storage and desktop/webview integration.
- Built MCP-based document retrieval and AI tools with scoped access and execution limits; used logs and diagnostic packages to investigate integration issues.

EXPERIENCE

EYOSOFT - Software Engineering Intern | February 2026 - August 2026

- Contributed to REST API and microservice design discussions in a Java environment; participated in Agile stand-ups and collaborative code reviews.

TECHNICAL SKILLS

Languages: Java, Go, SQL, JavaScript, C#

Backend: Spring Boot, REST APIs, Spring Security, Spring Data JPA, Hibernate, JWT

Data & tools: MySQL, SQLite/SQLCipher, H2, Git, Linux (Ubuntu/WSL2)

AI & applications: MCP, LLM tool calling, schema validation, automated testing, Wails, Svelte
