Education

Sivas Cumhuriyet University – B.Sc. in Computer Engineering
2022 – Present
GPA: 3.09 / 4.00

Technical Skills

- Programming Languages: Java, SQL, JavaScript, C#
- Frameworks & Tools: Spring Boot, Spring Security 6, Spring Data JPA, Hibernate, React, MySQL, H2 Database, Git, Axios
- Areas of Expertise: Backend Development, RESTful API Design, Microservices Architecture, Relational Database Management, Stateless Session Management
- Game Development: Godot 4, Event-Driven Systems, Data-Driven Architecture, Save Systems, Inventory Systems, Procedural Content Systems

---

Experience

EYOSOFT – Software Engineering Intern August
2025 – September 2025

- Participated in the design of REST API endpoints and the definition of microservice components within a corporate Java ecosystem.
- Actively contributed to Agile software development processes, including daily stand-up meetings and team-based code review activities.

Projects

Exiletide – Data-Driven Survival Sandbox Game

- Developed a 2.5D survival sandbox game in Godot 4 using C#, implementing a service-oriented and data-driven architecture for scalable gameplay systems.
- Built inventory, crafting, minimap, save/load, and deterministic world-generation systems using modular services, content registries, and event-driven communication patterns.
- Designed an authoritative world-state system with request-based gameplay workflows for future server-authoritative multiplayer support in mind.

GetaJob – Job Seeker & Employer Platform (School Project)

- Implemented authentication and authorization mechanisms using Spring Security 6 and JWT-based stateless session management.
- Developed RESTful services using Java 17 and Spring Boot 3.x to enable JSON-based data exchange between frontend and backend components.
- Optimized the persistence layer using Spring Data JPA and Hibernate, improving and data access efficiency.

Languages

- English: B2 – Proficient in reading and writing technical documentation
